

# Fantasy Horde - Goblin

[www.polygonmaker.com](http://www.polygonmaker.com)

## How to Use

There are some animated characters with a several weapons and accessories attached. Ready for use. Add the asset in your scene and delete those weapons and accessories you don't want. Then just chose one material that fits with your project. All animations are already set.

Please leave a feedback at Unity asset store if you liked! This is important for us.  
In case of any problem or suggestion send a e-mail to [polygonmaker@gmail.com](mailto:polygonmaker@gmail.com)

## Mesh

The total polycount (tris) per model goes from 1500 to 2500 (no gear to full gear)

There are 4 main models:

Warrior  
1604 tris

Ranger  
1604 tris

Mage  
1618 tris

All have their own accessories set (hair, boot, hat, mask, armor) and weapons set. Plus an arrow.

Mage Staff

Warrior Weapons

Ranger Weapons

Weapons polycount (tris)

104 14 48 77 92 51 41 104 218 267 414

Female  
1682

Female accessories

Accessories polycount: 24 to 200 per object

## Texture

Some assets share the same texture.  
There are 4 types:

- **Diffuse**
- **Specular**
- **Color mask**
- **Transparency**

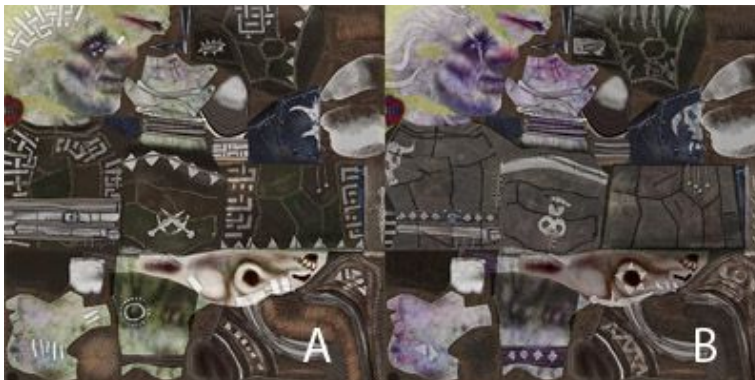

Accessories and body share the same texture:

- **goblin warrior:** Warrior and Ranger (accessories and body)

Warrior and Ranger Weapons share the same texture:

- **goblin mage:** Mage (accessories and body)

- **goblin female:** Female (accessories and body)

- **goblin weapons:** Warrior, Ranger and Female weapons

Mage staff uses a unique texture

- **goblin mage staff:** Mage Staff

There is a .psd file (fantasy horde - goblins\_texture\_mixer.psd) that include all textures not compressed with a layer on top that can be used to change the texture color and bake a colored version. Just in case someone needs to use another shader without the color mask option.

## **Animation**

This is the list of animation:

Warrior/ Ranger:

Name	Star	End
idle	5	120
idle break 1	120	190
idle break 2	190	290
salute	290	369
jump simple	370	380
walk	385	415
run	420	450
run fast	455	480
crouch	485	499
crouch walk	500	550
hit front	554	564
hit back	565	575
jump complete	580	623
falling	625	665
die soft	668	740
die hard	745	770
idle fight	775	820
idle break fight	820	870
blocking	870	890
axe attack	890	910
sword attack	910	930
sword double attack	930	960
arch attack	960	1015
spear prepare	1015	1025
spear attack	1025	1045

Mage/ Female:

Name	Star	End
idle	5	120
idle break 1	120	190
idle break 2	190	290
salute	290	369
jump simple	370	380
walk	385	415
run	420	450
run fast	455	480
crouch	485	499
crouch walk	500	550
hit front	554	564
hit back	565	575
jump complete	580	623
falling	625	665
die	668	740
idle fight	775	820
idle break fight	820	870
axe attack	890	910
casting A	910	940
casting B	940	965

**Female animation:** Uses the same animations from mage with rescaled bones plus a separated file with walk and run.

**Creating new animations:** There are some 3dsmax files at "Extra content" folder that can be used to create new animations. All bones from this package are called "bip\_horde" made using CAT system from 3dsmax. Thus any animation can be reused for other character.

**JUMP ANIMATION:** There are two types of jump:

-Jump Simple: The character just push his legs, direct use. Mesh doesn't move up (easy to control collision mesh)

-Jump Complete: The character do all jump animation. (Anticipation: 580-593, Up: 593-601, Down: 602-623).
